

Waste Volume Reduction Compressor

High-performance garbage compressor designed for efficient waste management. This robust unit features a large-capacity compression chamber and heavy-duty hydraulic system.

Product Overview

High-Performance Waste Management

This high-performance garbage compressor is engineered for efficient waste volume reduction in industrial, commercial, and municipal settings. Featuring a robust steel frame and a heavy-duty hydraulic system, it is designed to minimize disposal costs and enhance environmental sustainability. The unit includes automated controls, a large-capacity compression chamber, and is mounted on wheels for superior mobility and ease of use.

Technical Specifications

Construction	Durable steel frame
Mobility	Yes

Key Features

Safety Systems

- Safety interlocks
- Automated control system

Operational Benefits	Volume Reduction, Cost Efficiency, Sustainability, Automated Controls
----------------------	---

Applications

Suitable For

Industrial • Commercial • Municipal
