Product Overview

Industrial Power Solution

This water-cooled diesel generator set is engineered for consistent and reliable electricity generation in demanding environments. Designed with a robust soundproof canopy and integrated digital control system, it offers stable output through automatic voltage regulation. The unit is built for durability, featuring a heavy-duty base frame suitable for industrial, commercial, and residential standby power applications.

Technical Specifications

Operational Frequency	50 Hz
Cooling Method	Water Cooled

Design & Build

Enclosure	Soundproof canopy
Transport Features	Base frame mounted, Forklift accessible

Control & Monitoring

Control System

- Digital control panel
- Automatic Voltage Regulation (AVR)
- Integrated protection systems
- Fuel metering
