Overview

Industrial Water Curtain Spray Booth

This industrial spray booth is engineered for the efficient removal of airborne paint particles and fumes during finishing operations. It utilizes a sophisticated water curtain system that captures overspray, ensuring a clean and safe environment for operators. Built with robust materials and integrated lighting, this system is designed for high-performance in industrial painting and coating applications.

Technical Specifications

Core Features

- Continuous washing action
- Powerful extraction fan
- Overhead integrated lighting
- Recirculating water reservoir
- Integrated control panel

Filtration Mechanism	Water curtain recirculation system
Material Construction	Robust metal with stainless steel water curtain

Compliance & Identification

Certifications	CE
Model Identification	SH9225
