Product Overview

Versatile Water Distribution Truck

This 2.12cbm water tanker is constructed from durable Q235 carbon steel, making it ideal for high-demand environments. It offers multifunctional utility, including road maintenance, landscaping, dust suppression, and emergency fire fighting. The system is designed for flexibility, featuring adjustable front flushing, rear watering, and side spraying capabilities.

Technical Specifications

Tank Capacity	2.12 cbm
Tank Material	Carbon Steel Q235

Performance Features

Primary Applications

- Road cleaning and flushing
- Dust suppression
- Landscaping and irrigation
- Emergency fire fighting
- Water transport and diversion

Available Spraying Modes	Front Flushing, Rear Watering, Side Spraying
--------------------------	--

Logistics and Delivery

Shipping Protection

- Protective wax spray
- Waterproof cover
- Strong steel support for superstructure

Typical Production Time

25 days

Supported Shipping Methods

Standard Container, Frame Container, Open Container, RORO Ship, Bulk Ship, Road Transport
