Product Overview

High-capacity roll forming system for downpipe production.

High-Efficiency Production

This water downpipe roll forming machine is engineered for high-volume, precision manufacturing of downpipe profiles. Featuring a robust steel frame and an automated feeding and forming system, it ensures consistent dimensional accuracy across various metal types. The machine includes comprehensive control systems for speed and pressure regulation, making it a reliable solution for professional metal fabrication environments.

Service & Support

After-Sales Services

- One year machine warranty
- 24/7 technical support via digital channels
- Instructional manuals and operation videos provided
- Optional on-site technician deployment for installation and training
