

Water Flow Meter with Adjustable Valve

This water flow meter is designed to measure and control water flow rates. It features a T-shaped body with threaded connections and an adjustable valve.

Product Overview

High-Precision Water Flow Control

This water flow meter is engineered for precise measurement and regulation of water flow rates in professional environments. Featuring a robust T-shaped body with threaded connections, it integrates seamlessly into irrigation systems, industrial processes, and water treatment setups. Its adjustable valve allows for fine-tuned control, making it a versatile tool for managing water resources efficiently.

Key Performance Metrics

Flow Performance

1 ton/h

Minimum Flow Rate

3 ton/h

Maximum Flow Rate

Technical Specifications

Model Number	A25152
Total Length	152 mm

Connection Details

Connection Type

Threaded • T-Shaped Body

Main Port Diameter	3/4 inch
Adjustable Valve Diameter	1/4 inch

Applications

Recommended Use Cases

- Irrigation systems
- Industrial processes
- Water treatment applications
