

Water-Foam Fire Fighting Vehicle

This high-performance vehicle is designed for rapid response and effective suppression of various fire types. It is equipped with a large-capacity water and foam tank, delivering a powerful extinguishing capability.

Overview

High-Capacity Fire Suppression

This heavy-duty water-foam fire fighting vehicle is engineered for large-scale fire suppression in demanding environments. Featuring a massive 24,000-litre tank capacity and an impressive 120-meter throw range, it provides exceptional reach and endurance. The system supports simultaneous operation of 10 output ports, making it a highly effective solution for rapid response and fire control.

Performance Metrics

Flow Rate

10000 L/min

Flow Rate

Throw Range

120 m

Max Throw Range

Capacity & Compatibility

Tank Capacity	24000 L
Water Compatibility	Fresh Water, Salt Water

Operational Capabilities

Key Operational Features

- High-flux fire fighting system
- Simultaneous multi-port output
- Heavy-duty chassis architecture
- Designed for large-scale fire suppression

Output Ports	10 ports
