Product Overview

Professional Firefighting Solution

This Water Foam Tender is a specialized firefighting vehicle designed for both municipal and industrial emergency response. It integrates a high-capacity water tank with a professional foam proportioning system to effectively suppress fires involving solid materials and flammable liquids. Built on a heavy-duty chassis, it offers the stability and power required for rapid deployment in diverse operational environments.

Key Features

Operational Capabilities

- Independent firefighting for solid fuel fires
- Effective suppression for oil and chemical fires
- High-pressure foam/water supply capability
- Mobile water and foam storage

System Components

Included Equipment

Fire Pump, Water Tank, Foam Proportioning System, Fire Monitor, Nozzles

Operational Standards

Application Fields

Municipal Fire Service • Industrial Firefighting • Fuel and Oil Facilities
