Product Overview

Water Heater Control Systems

These professional-grade control circuit boards and digital display panels are designed for precise water heater management. The product line offers various configurations ranging from simple mechanical digital displays to advanced remote-controlled touch-panel systems. With integrated safety features and versatile temperature settings, these components ensure reliable operation and user-friendly control for diverse water heating applications.

Technical Specifications

Temperature Range

0 °C

Min Temp

85 °C

Max Temp

Power Modes

Low Power, Medium Power, High Power

Model Comparison

Available Models

Model	Type	Dimensions
K8-C63	Touch Screen	320x110mm
C7B	Remote Control	135x52mm
C1	Remote Control	170x70mm
-A62	Mechanical Digital	370x70mm
A9	Universal Digital	30x35mm

Features

System Capabilities

- Remote control compatibility
- Timed on/off scheduling
- Heating/Insulation status indicators
- Real-time temperature display
- Three-stage power selection
