Product Overview

Industrial Water Heating Air Curtain

The .014 series water heating air curtain is designed to maintain consistent indoor temperatures by creating a powerful thermal barrier. This system effectively separates internal environments from outside conditions, blocking dust, insects, and external pollutants while preserving conditioned air. Engineered for industrial and commercial doorways, it provides efficient temperature management and energy savings through its high-performance water heating system.

Technical Specifications

Motor Power Options

- 90
- 95
- 120
- 180
- 240

Rated Voltage	220V-240V
Rated Frequency	50-60HZ
Series Compatibility	SM3509, SM3510, 3512, 3518

Key Features

Protective Capabilities

- Prevents heat loss
- Blocks summer heat and winter cold
- Filters dust and insects
- Reduces smoke and bad odors
- Maintains clean and temperature-controlled air

Control System

Remote control with speed adjustment and power functionality
