Product Overview

Dual-Use Performance System

This versatile unit provides a dual-use solution for both high-capacity water pumping and reliable power generation. Engineered for maximum efficiency, it serves agricultural, industrial, and emergency power requirements with ease. The integrated design features a robust engine base and a centralized control system for intuitive operation and monitoring.

Performance Metrics

Core Specifications

300 m³/h

Flow Rate

32 m

Max Lift

328 mm

Impeller Diameter

Applications

Suitable Industries

Agriculture, Industrial, Emergency Power
