

Water Pump for Irrigation and Dewatering

This water pump is designed for agricultural and industrial applications. It delivers high flow rates and pressure for efficient water transfer.

Overview

Reliable Water Management Solution

This water pump is engineered for efficient irrigation and dewatering tasks in agricultural and industrial settings. Powered by a 4-stroke, air-cooled engine, it delivers consistent performance with a flow rate of 4.2 cubic meters per hour. Its compact, lightweight design ensures easy portability and stability, making it an ideal choice for demanding field operations.

Engine Specifications

Engine Configuration

Feature	Specification
Engine Model	GX35
Engine Type	4-stroke, air cooling, single cylinder
Displacement	35.8 cc
Ignition/Starting	Recoil Start

Fuel Tank Capacity	0.6 L
