

Water Pump for Irrigation and Drainage

This water pump is a robust solution for drainage and irrigation needs. It is designed for efficient water transfer in agriculture, construction, and emergency situations.

Product Overview

Professional Water Management Solution

The SS30PG water pump is a robust and reliable solution designed for efficient water transfer across various professional applications. It is engineered to handle clean or slightly dirty water, making it an essential tool for agricultural irrigation, construction site management, and emergency drainage. With a powerful engine and a durable frame for stability and portability, this pump ensures consistent performance in demanding environments.

Performance

Performance Highlights

30 m³/h

Flow Rate

Key Features

Design Features

- Robust construction for long-lasting performance
- Powerful engine for high flow rates
- Integrated frame for stability
- Portable design for easy transport

Suitable Applications

Agricultural Irrigation, Construction Sites, Emergency Drainage

Technical Specifications

Water Compatibility

Clean or slightly dirty water
