

Water Pump for Irrigation and Drainage

This water pump is designed for irrigation and drainage applications. It delivers efficient water transfer with its durable engine and high-capacity pump.

Overview

Reliable Water Management Solution

The CP50/CP80 is a robust and reliable water pump specifically engineered for demanding irrigation and drainage applications. Featuring a durable engine and high-capacity pump architecture, it delivers efficient water transfer suitable for both agricultural and industrial environments. This unit is built with a sturdy frame to ensure portability and stability during operation, making it an ideal choice for professional water management needs.

Performance

Key Features

- High-capacity water transfer
- Durable engine construction
- Sturdy frame for stability
- Portable design

Primary Applications

Irrigation, Drainage, Agricultural, Industrial
