

Water Pump System Accessories

Comprehensive selection of accessories for water pump systems. Includes various float switch types for level control, horizontal and vertical pressure tanks in different capacities, pressure gauges, flexible hoses, brass connectors, foot valves and pressure switches.

Product Overview

Professional Water Pump Accessories

This comprehensive range of water pump system accessories is designed for reliability and seamless integration in various plumbing and industrial water management applications. The collection includes precision-engineered pressure controls, durable storage tanks, and robust connection components that ensure efficient system performance. Each part is built for compatibility, providing professional installers with the necessary tools for both automatic control and manual maintenance.

Control and Monitoring

Control Components

- Float Switches (5 variations)
- Pressure Switches
- Pressure Gauges

Pressure Tanks

Tank Orientations

Horizontal • Vertical

Available Tank Capacities

12L, 19L, 24L, 36L

Plumbing and Connectivity

Installation Accessories

Component	Function
Flexible Hose	Connection
Brass Connector	Plumbing
Foot Valve	Backflow Prevention
