

Water Pump System with Vertical Pressure Tank

This water pump system features a vertical pressure tank and centrifugal pumps. It also includes a control panel for managing the system's operation.

System Overview

Integrated Pumping Solution

This advanced water pump system is engineered for reliable fluid management and pressure maintenance. It features a robust vertical pressure tank paired with dual centrifugal pumps, all mounted on a stable steel frame for easy installation. The included control panel provides precise management of the system, making it an ideal choice for demanding industrial and commercial water distribution applications.

Technical Specifications

Pump Type	Dual Centrifugal Pumps
Tank Configuration	Vertical Pressure Tank

System Components

System Components

- Vertical Pressure Tank
- Dual Centrifugal Pumps
- Integrated Control Panel
- Steel Mounting Frame
- Piping and Valve Assembly

Control System

Control Panel Features	Indicator Lights, Manual Switches, Digital Display
