

Water Sprinkler Truck with High-Pressure Cannon

This water sprinkler truck is equipped with a high-power water pump. It can perform front flushing, rear spraying, and side spraying with a rear-mounted work platform and a high-pressure greening sprinkler cannon.

Overview

High-Performance Water Sprinkler Truck

This versatile water sprinkler truck is engineered for efficient municipal and industrial water management. Equipped with a high-power water pump, it features a vertical suction range exceeding 6 meters and supports front flushing, rear spraying, and side spraying capabilities. The rear-mounted work platform houses a high-pressure greening cannon that offers 360-degree rotation and an impressive spray range of over 30 meters, making it ideal for large-scale landscaping and sanitation tasks.

Key Features

Performance Metrics

6 m Vertical Suction Range	30 m Cannon Spray Range
--------------------------------------	-----------------------------------

Operational Capabilities

Front Flushing, Rear Spraying, Side Spraying, Self-Priming, 360-Degree Rotation, High-Pressure Cannon
