

Water Transfer Pump

These pumps are designed for efficient water transfer in agricultural and construction applications. They are capable of handling clear and solids-laden water, offering high flow rates and discharge pressure for maximized productivity.

Overview

Efficient Water Transfer Solution

This water transfer pump is designed for professional use, featuring a concise and lightweight frame that ensures easy portability and setup. Engineered for reliability, the unit is simple to operate and includes protective rubber stents on the fuselage to enhance durability during heavy-duty tasks. It comes equipped with an integrated oil alarm system to ensure safe and consistent engine performance.

Design & Build

Protection

- Rubber stents on fuselage
- Oil alarm system

Design Features

Lightweight, Concise Design, Easy to Start, Easy to Operate
