

# Water Transfer Pump

This water transfer pump is a robust and reliable solution for various water transfer applications. Featuring a powerful engine, it delivers efficient pumping performance with a high flow rate and suction capability.

## Overview

### High-Performance Water Transfer Solution

This robust water transfer pump is engineered for reliable performance in demanding environments, making it an ideal choice for irrigation, drainage, and general water management. Equipped with a powerful 4-stroke, air-cooled engine, it delivers efficient flow rates and impressive suction capabilities. Its durable construction ensures longevity, while the compact design allows for easy transport and deployment across various job sites.

## Performance

### Key Performance Metrics

**20 m<sup>3</sup>/h**

Flow Rate

**20 m**

Lift Height

**6 m**

Suction Depth

Pipe Diameter

50 mm

## Engine Specifications

Engine Configuration	4-stroke, Air-cooled, Single cylinder
Engine Model	KB168FB-K
Displacement	196 cc
Ignition & Starting	Transistorized Magneto / Recoil Start
Fuel Tank Capacity	3.6 L

## Physical Attributes

Dimensions	475 x 395 x 415 mm
Weight (G.W/N.W)	24 / 22 kg

## Logistics

### Container Loading Capacity

Container Type	Units
20GP	370
40HQ	780
