

Water Transfer Pump

This pump efficiently transfers water between locations. Its durable construction ensures reliable performance for demanding applications.

Product Overview

Professional Welding Application Cable

This high-performance rubber and PVC insulated cable is specifically engineered for robust welding applications. Featuring a durable copper strand construction, it ensures reliable power delivery and flexibility in demanding work environments. The product is fully compliant with IEC 60245-6 international standards, providing safety and consistency for professional industrial use.

Technical Specifications

Cable Series	YH/YHF
Insulation Material	Rubber, PVC
Conductor Material	Copper

Compliance and Standards

Standard Compliance
IEC 60245-6
