

Water Transfer Pump

This water pump provides a versatile solution for different water transfer needs. Its robust engine and durable pump ensure efficient performance and long-lasting operation.

Product Overview

High-Performance Water Transfer Pump

This versatile water transfer pump is engineered for reliability and efficient performance in demanding environments. Equipped with a robust 5.5HP engine, it is designed for agricultural, construction, and domestic water management tasks. Its lightweight and compact construction, paired with a sturdy frame, ensures both easy portability and long-lasting operational stability.

Technical Specifications

Engine Power

5.5 HP

Rated Power

Model Series

GP160

Key Features

Product Highlights

Lightweight, Automatic Engine, Portable Design, Sturdy Frame

Applications

Suitable Sectors

- Agricultural irrigation
- Construction site drainage
- Domestic water transfer
