

Waterproof 2-SMD 5050 LED Module

High-brightness 2-SMD 5050 LED module is designed for various lighting applications. It features robust, waterproof construction and operates on DC 12V, making it ideal for signage, backlighting, and decorative lighting projects.

Overview

High-Performance LED Solution

This high-brightness 2-SMD 5050 LED module is engineered for versatile lighting applications, offering reliable performance in demanding environments. Designed with robust, waterproof construction, it is an ideal choice for outdoor signage, professional backlighting, and creative decorative lighting projects. Operating efficiently on DC 12V, this module combines durability with ease of installation for various commercial lighting needs.

Technical Specifications

LED Type	2-SMD 5050
Operating Voltage	12 V
Power Source	DC

Compliance & Standards

Certifications	CE, RoHS
