

Waterproof Abrasive Sandpaper for Fine Polishing

This sandpaper is designed for both wet and dry sanding applications, with grit sizes ranging from 240 to 5000. It is ideal for achieving precision polishing on paints, instruments, metal, composite materials and electronics.

Product Overview

Premium Waterproof Abrasive Paper

This professional-grade abrasive paper features a 30% latex-infused Cwt backing, ensuring exceptional flexibility and anti-curl performance during use. Designed for both wet and dry applications, it excels in precision polishing tasks ranging from automotive repairs to fine instrument finishing. With an extensive grit range of 240 to 5000, it provides a consistent, high-quality surface finish for paints, metals, and composite materials.

Technical Specifications

Construction Details

- Abrasive Grain: Silicon Carbide
- Backing Material: 30% Latex Cwt Paper
- Bonding Type: Resin over Resin (R/R)

Available Grit Sizes	240, 400, 600, 800, 1000, 1200, 1500, 2000, 2500, 3000, 4000, 5000
Standard Sheet Dimensions	230mm x 280mm (9" x 11")

Applications

Recommended Applications

- Automotive production and body repair
- Precision instrument finishing
- Paint and coating sanding
- Metalworking
- Composite material processing
- Electronics surface refinement

Logistics

Standard Packing Specifications

Format	Unit Quantity
Sheets per Bale	100
Sheets per Carton	1000
