

# Waterproof Abrasive Sandpaper for Metal and Stone Polishing

This waterproof abrasive sandpaper features a kraft paper base. It is designed for wet sanding and polishing of metal and non-metal workpieces, suitable for automotive, machinery mold, hardware, stone, and craftwork applications.

## Product Overview

### Professional Abrasive Solution

The C34P waterproof abrasive paper features a high-quality kraft paper base, specifically engineered for wet sanding and polishing applications. It is widely utilized across automotive, machinery mold, hardware, and stone industries to deliver superior surface finishes on both metal and non-metal workpieces. Its durable resin-over-resin bonding ensures consistent performance, while the wide range of available grits accommodates both heavy material removal and fine surface finishing.

## Technical Specifications

Abrasive Grain	Silicon Carbide
Backing Base	Cwt Kraft Paper
Bonding	Resin / Resin
Grit Range	60, 80, 100, 120, 150, 180, 220, 240, 280, 320, 350, 400, 500, 600, 800, 1000, 1200, 1500, 2000, 2500, 3000

## Physical Dimensions

### Available Forms

- Sheet
- Roll
- Disc

Standard Sheet Size	230 x 280 mm
---------------------	--------------

## Logistics and Packaging

### Packaging Quantities

Format	Quantity
Per Bale	100 sheets
Per Carton	500 or 1000 sheets

## Application Areas

### Suitable Industries

Automotive • Machinery Mould • Hardware • Stone • Craftwork
