

Waterproof AC to DC Switching Power Supply

This waterproof switching power supply converts AC voltage to DC voltage. It accepts an input of AC 180-250V and provides a DC 12V output.

Product Overview

Professional Waterproof Switching Power Supply

This high-reliability switching power supply is engineered for demanding outdoor environments, efficiently converting AC input voltage to stable DC power. Designed specifically for LED lighting applications, it ensures consistent performance and longevity. The unit features robust construction to withstand outdoor conditions, providing a dependable solution for professional lighting installations.

Technical Specifications

Performance Metrics

250 W

Max Power Rating

20.8 A

Max Output Current

Important Usage Notes

- Designed for outdoor use
- If LED flickering occurs, reduce the number of connected modules

Input Voltage Range	180-250V AC
Input Frequency	47-63Hz
Output Voltage	12 V DC

Model Variants

Model Specifications

Model	Output Current	Power
HB-250W/12V	20.8A	250W
HB-L100W/12V	8.2A	100W
HB-L60W/12V	5A	60W
