

Waterproof Aviation Connector with Butt Joint

This waterproof aviation connector features a butt joint design for secure connections. It offers IP68 protection against dust and water immersion and is flame retardant for enhanced safety.

Product Overview

Robust Waterproof Aviation Connector

The SP21 series aviation connector is engineered for reliable performance in harsh environments, featuring a durable butt joint design. With an IP68 protection rating, this connector ensures complete resistance against dust and prolonged water immersion, making it ideal for demanding industrial, marine, and aerospace applications. Its flame-retardant construction adds an essential layer of safety for critical connectivity needs.

Technical Specifications

IP Rating

IP68

Model Series

SP21

Core Configuration

2 to 12 cores

Features

Key Features

Waterproof, Dustproof, Flame Retardant, Butt Joint Design

Applications

Recommended Use Cases

- Industrial Equipment
- Marine Applications
- Aerospace Systems
