Product Overview

Industrial Emergency Stop Solution

This high-performance emergency stop button features a robust mushroom-shaped actuator designed for immediate and reliable shutdown in critical industrial environments. Engineered with premium zinc alloy and anti-flame materials, it ensures durability and safety for control circuits up to 660V. With its waterproof design and adherence to international safety standards, this component is an ideal choice for control panels, machinery, and emergency warning systems.

Technical Parameters

Protection Grade

IP65

Rated Insulation Voltage

600 V

Conventional Heating Current

10 A

Mechanical Life (Emergency Stop)

300000 ops

Operating Temperature

-5°C to +55°C

Compliance & Certification

Industry Standards	IEC60947-5-1, GB/T14048.1, GB14048.5
Certifications	CE, ISO 9001, ROHS, UL

Mounting Specifications

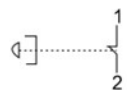

XDL21-CS542

Emergency stop
Turn to release

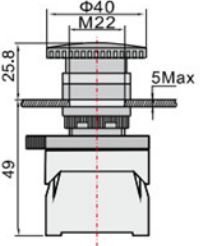

N/C

Emergency stop
Push-pull

● Red Φ 40 XDL21-CS542

● Red Φ 40 XDL21-CT42

Mounting and Size Data

Feature	Dimension/Value
Mounting Hole	22mm
Mushroom Diameter	40mm
Max Panel Thickness	5mm
Total Height	49mm
