

Waterproof Light Switch with French Socket

This waterproof light switch integrates a French socket for outdoor applications. It has an IP65 rating, ensuring protection against water and dust.

Product Overview

Built-in tamper-resistant system ensures safety against electrical shock.

Rugged Outdoor Electrical Solutions

This industrial-grade waterproof light switch and French socket outlet is engineered for reliability in challenging outdoor and damp environments. Featuring an IP65 protection rating, it provides robust defense against water and dust ingress. Designed with safety in mind, it includes a tamper-resistant system and is constructed from halogen-free, fire-resistant thermoplastic materials.

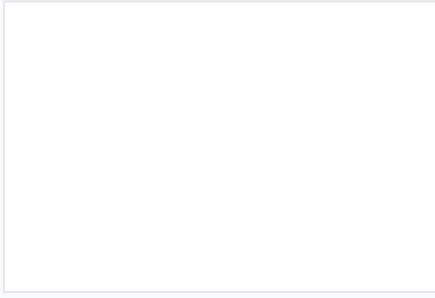

Technical Specifications

Ingress Protection (IP) Rating

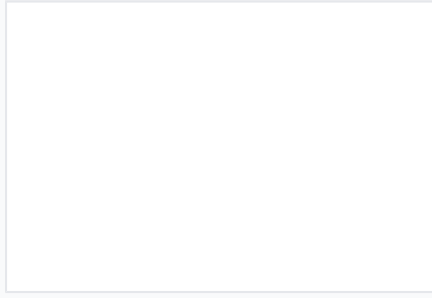

IP65

Rated Voltage	250 V
Rated Current	16 A
Compliance Standard	European Standard
International Certifications	CE, CB, ROHS, TUV, VDE

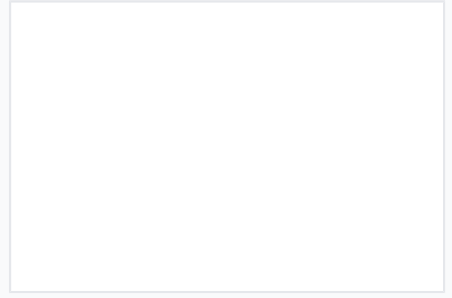

Features & Construction

Flexible terminal options for secure installation: choose between spring-clamp screwless or traditional screw terminals.

Versatile design allowing for both horizontal and vertical installation configurations.

The efficient quick-lock system allows for easy assembly and secure locking with a 90-degree rotation.

Material Characteristics

- Thermoplastic housing
- Halogen-free
- Fire-resistant
- Chemical resistant

Installation Highlights

- Quick lock system (90-degree rotation)
- Easy module replacement
- Horizontal and vertical configuration
- Tamper-resistant system
