

Waterproof Mushroom Head Pushbutton Switch

This waterproof pushbutton switch features a 40mm red mushroom head for easy activation. Designed for electric power applications, this push-pull switch offers reliable performance and durability in demanding environments.

Product Overview

Specializing in production of buttons and indicators since 1997

The robust push-pull mechanism is designed for reliable operation in wet or dusty industrial environments.

Robust Industrial Pushbutton Switch

The XDL32-ET45 is a high-performance, waterproof push-pull switch featuring a 40mm red mushroom head for immediate and reliable activation. Engineered for demanding industrial environments, it features silver alloy contacts for excellent anti-electrical erosion properties and a durable construction. This switch complies with international electrical standards, ensuring it is suitable for control panels, machinery, and emergency stop systems where safety and dependability are paramount.
