Product Overview

High-Level Electrical Protection

This high-level plastic waterproof enclosure is engineered for reliable protection of sensitive electrical components in demanding environments. Designed for power transmission and distribution applications, it effectively safeguards against water, dust, and environmental stressors. Its durable construction ensures long-lasting performance and safety for both indoor and outdoor installations.

Technical Specifications

Suitable Environments

- Indoor electrical installations
- Outdoor power distribution
- Demanding environmental conditions

Protection Features

Waterproof, Dustproof, Corrosion Resistant

Design & Construction

Key Design Features

- Secure lid with gasket seal
- Integrated mounting holes
- Smooth, clean finish
- High-quality durable plastic material

Material Quality

High-Grade Plastic • Corrosion Resistant
