

Waterproof Sandpaper for Wet and Dry Sanding

This waterproof sandpaper is suitable for both wet and dry sanding applications. Its flexible backing makes it ideal for contour sanding across automotive, woodworking, and metalworking industries, ensuring efficient material removal and a consistent finish.

Product Overview

Professional Wet and Dry Abrasive Solution

CP38 is a high-performance abrasive paper engineered for both wet and dry sanding applications. Featuring premium silicon carbide grains bonded with resin over resin on a 30% latex CWT blue paper backing, it offers superior flexibility and durability. This product is designed to maintain its shape without curling in water, ensuring a consistent and high-quality finish on both flat and irregular surfaces.

Technical Specifications

Abrasive Grain	Silicon Carbide
Grit Range	P60 - P7000
Backing Type	30% Latex CWT Blue Paper
Bonding	Resin over resin

Application & Usage

Recommended Industries

- Automotive production and repair
- Precision instrument manufacturing
- Metalworking
- Composite materials
- Electronics

Sanding Type	Wet Sanding, Dry Sanding
