

Waterproof Wall-Mounted Fan

This waterproof fan is designed for durability and reliability in demanding environments. Its robust construction ensures resistance to water and moisture, making it suitable for use in areas where exposure to liquids is a concern.

Product Overview

Industrial-Grade Misting Solution

This wall-mounted waterproof fan utilizes advanced misting technology to deliver cooling and air purification in demanding environments. By emitting fine mist particles (10-25 microns), it effectively reduces ambient temperatures by 3-8°C through evaporation while increasing humidity and suppressing dust. Designed for safety and longevity, the system features a water-electricity separation structure and intelligent warning protection to ensure reliable operation in both public and industrial settings.

Technical Specifications

Mist Particle Size	17.5 microns
Temperature Reduction	5.5 °C

Certifications

Regulatory Compliance	CE, CB, CCC
-----------------------	-------------

Design Features

Safety Systems

- Water and electricity isolation
- Human-intelligent warning system
- Non-clogged misting nozzle technology
- Robust waterproof construction

Applications

Recommended Environments

- Open squares and playgrounds
- Stadiums and airports
- Outdoor restaurants and villas
- Industrial textile and casting workshops
