

Wax Roller Heater for Hair Removal

This compact wax roller efficiently heats and applies wax for hair removal. Its ergonomic design includes a transparent window to monitor wax levels, ensuring even wax distribution for smooth application.

Product Overview

Professional Waxing Efficiency

The Wax Roller Heater is a compact and efficient device designed for heating and applying wax for hair removal. Featuring a sleek, ergonomic design with a transparent window, it allows users to easily monitor wax levels during use. The roller mechanism ensures even wax distribution, providing a smooth and consistent application for both professional salon environments and personal use.
