Product Overview

Professional Wax Sealing Solution

The FL-4 (H) semi-automatic wax sealing machine is engineered for the precise and professional application of wax seals to wine bottle mouths. Designed for efficiency, it combines a robust semi-automated process with user-controlled operation to ensure consistent product integrity. Its durable construction and integrated cooling systems make it an ideal choice for high-volume production lines seeking to prevent leakage while enhancing brand presentation.

Operational Details

Loading Procedure

- Manual bottle placement into designated slots
- Bottles handled in pairs
- Bottle neck secured in shoulder pad
- Automated immersion and rotation process
- Manual removal after cycle completion

Equipment Type

Semi-automatic wax sealing machine

Technical Specifications

Cooling Mechanism	Yes
Build Material	Stainless Steel, Industrial Grade
Safety Equipment	Emergency Stop, Protective Enclosures
Control Interface	Touchscreen
