

WCB Industrial Globe Valve

This industrial globe valve is constructed from WCB (Weldable Cast Carbon Steel) material and conforms to API standards. It is designed for regulating flow and providing shutoff capabilities in a variety of industrial processes.

Product Overview

Industrial Globe Valve

This industrial globe valve is manufactured using high-quality Weldable Cast Carbon Steel (WCB), ensuring durability and reliability in demanding industrial environments. Engineered to conform to API standards, it is specifically designed for precise flow regulation and effective shutoff applications. Its robust construction makes it an ideal solution for controlling fluids in high-pressure and high-temperature process systems.

Technical Specifications

Pressure Rating

150 lb

Pressure Class

Connection Type

Flanged

Material

WCB (Weldable Cast Carbon Steel)

Operation

Manual Handwheel

Compliance & Standards

Standards

API

Application

Primary Applications

- Flow regulation
- Shutoff applications
- High-pressure fluid control
- High-temperature process systems
