

WD615 Euro 2 Diesel Engine

This diesel engine delivers optimal power while maintaining low fuel consumption. Its design ensures durability and minimizes emissions.

Overview

High-Performance Diesel Engine

The WD615 Euro 2 Diesel Engine is a 10L powerhouse designed for efficiency and durability. It features a wide maximum torque speed range of 1100-1600 r/min, ensuring excellent acceleration and gradeability. With a focus on fuel economy, it achieves a low fuel consumption ratio of 193g/kW.h, making it a competitive choice for heavy-duty applications.

Performance Metrics

Lowest Fuel Consumption Ratio

193 g/kW.h
Fuel Consumption

Displacement	10 L
Max Torque Speed Range	1100-1600 r/min

Compliance & Standards

Emission Standard
Euro 2

Key Features

Engine Advantages

- Wide speed range at maximum torque
- High torque backup coefficient
- Improved acceleration and grade ability
- Optimized durability through design upgrades
- Low fuel consumption in medium and low speed zones
