

Weather Resistant Nylon Cable Tie

This nylon cable tie is made of weather resistant and anti-UV material. It is suitable for cable management, accommodating cable diameters from 15mm to 57mm, and has a closing withstand force of 350N.

Product Overview

High-Performance Nylon Cable Ties

These professional-grade cable ties are engineered from weather-resistant and anti-UV nylon, ensuring long-term reliability in demanding environments. Featuring a robust self-locking mechanism with a secure ratchet and pawl system, they provide adjustable and durable fastening for various electrical and automotive applications. The design combines high tensile strength with resistance to chemical exposure and abrasion, making it an ideal choice for complex cable management tasks.
