Overview

Robust Outdoor Protection

This weatherproof outdoor equipment cabinet is engineered to protect sensitive electronic systems from harsh environmental conditions. Featuring a static loading capacity of 800kg and a durable SPCC cold-rolled steel construction, it ensures reliability for telecommunications and industrial control applications. The design prioritizes ease of use with removable panels, efficient cable management, and ventilation features to prevent overheating.

Mechanical Specifications

Static Load Capacity

800 kg
Static Load

Material Thickness

Component	Thickness
Mounting Profile	2.0mm
Other Panels	1.2-1.5mm

Material	SPCC cold rolled steel
Surface Finish	Degreasing, Pickling, Phosphoric, Cleaning, Powder Coated

Design & Accessibility

Access Features

- Removable front door
- Removable rear door
- Removable side panels
- Top and bottom cable entry
- Ventilated bottom panel

Mobility & Stability

Adjustable feet • Castors available

Front Door Material

Tempered glass
