

# Weatherproof Stainless Steel Terminal Box

This IP66 terminal box is designed for robust electrical connections in harsh environments. Constructed from stainless steel, it offers excellent protection against dust, water, and corrosion with its securely gasketed lid.

## Overview

### Robust Weatherproof Protection

This stainless steel terminal box is engineered for demanding industrial applications, providing superior protection against dust and moisture with an IP66 rating. Constructed from high-quality SUS304 or SUS316 stainless steel, it features a foamed polyurethane gasket and secure captive screws to ensure a reliable seal. Designed for longevity and ease of maintenance, this enclosure is an ideal solution for outdoor or corrosive environments requiring secure electrical connections.

## Technical Specifications

### Protection Degree

IP66

### Standard Compliance

IEC 60529

### Body Material

Stainless Steel SUS304, Stainless Steel SUS316

### Surface Finish

Polished

### Body Thickness

1.2 mm

### Mounting Plate Thickness

2 mm

## Dimensions

### Featured Dimensions

**250 mm**

Height

**150 mm**

Width

**80 mm**

Depth

### Available Size Range

H150xW150xD80(mm) to H400xW200xD120(mm)

## Features

### Key Design Features

- Foamed polyurethane gasket on all four sides
- Earthing studs fitted on door and body
- 4 captive screws on door
- Galvanized steel mounting plate
