Product Overview

Professional Webbing Slings

These high-strength webbing slings are engineered for secure and reliable load lifting in industrial applications. Constructed from durable synthetic materials, they offer exceptional resistance to abrasion, chemical exposure, and UV degradation. The design includes reinforced eyes for stable connections and integrated safety tags detailing load limits for various hitch configurations.

Load Capacity Ratings

5000 kg
Straight Hitch

4000 kg
Choker Hitch

10000 kg
Basket Hitch

Safety and Compliance

Safety Considerations

- Do not knot the sling to avoid capacity reduction
- Protect sling from sharp edges of the load
- Do not expose sling to high temperatures
- Observe designated safety factor
- Check working load limits before every lift
