

# Webbing Sling

This light and soft webbing sling is non-conductive and easy to handle, transport, and store. It is designed to prevent damage to both the object being lifted and the user, with color-coded tonnage indicators and a simple safety inspection process.

## ADDITIONAL IMAGES

## Product Overview

### Flexible Circular Lifting Solution

The EA-B flexible circular webbing sling is designed for safe and efficient lifting operations. Weighing only 25% of comparable metal cables, these slings are lightweight, soft, and easy to handle and store. They are engineered to protect delicate surfaces and painted finishes from damage while ensuring no risk of injury to the operator.

## Safety & Performance

### Key Performance Features

- Shock absorption during use
- Corrosion-resistant
- Non-aging material
- Non-conductive
- Safe for use in flammable and explosive environments (spark-free)

### Compliance & Standards

ISO 9001:2008, OHSAS 18001:2007, ISO 14001:2004

## Technical Specifications

### Design Advantages

- Wide contact area for load stability
- Reinforced eyes for secure connections
- High resistance to abrasion
- UV degradation resistant
- Chemical exposure resistant
