

Wedge-Shaped Yellow Component with Hole

This is a wedge-shaped component with a yellow finish. It features a square, golden-colored detail with a circular hole on the top.

Product Overview

Precision Engineered Wedge Component

This specialized wedge-shaped component is designed with geometric precision, featuring a distinct yellow finish for high visibility. It incorporates a square, metallic-toned upper feature equipped with a central circular hole, facilitating secure mounting or alignment. This versatile part is suitable for industrial assemblies requiring specific triangular and rectangular profile configurations.

Design Specifications

Component Category

Precision Component • Structural Wedge

Component Color	Yellow
Mounting Interface	Square golden insert with circular hole
Geometric Profile	Wedge-shaped, Rectangular faces, Triangular faces
