

Wedge Wire Screen Filter

This wedge wire screen filter is designed for efficient separation and filtration. The filter features a perfectly round and smooth surface to minimize clogging and maximize flow rate.

Overview

High-Performance Filtration Solution

This wedge wire screen filter is engineered for superior separation and filtration efficiency in demanding industrial environments. Featuring a perfectly round and smooth surface design, it minimizes clogging risks while maximizing flow rates for consistent operational performance. Its robust construction ensures long-lasting durability, making it an ideal choice for critical applications in water treatment, oil and gas, and food processing sectors.

Certifications

Quality Standards

ISO 9001 • CNAS • IAF

Technical Features

Key Operational Benefits

- Minimized clogging
- Maximized flow rate
- High durability construction

Surface Characteristics

Perfectly round and smooth surface

Applications

Industrial Applications

Water Treatment, Oil & Gas, Food Processing
