

Weightlifting Bar with Parallel Grip

This high-quality, chrome-plated steel bar is designed for weightlifting and strength training. It features a closed-loop design with two parallel grip sections, allowing for a variety of exercises and grip options.

Product Overview

Professional Grade Parallel Grip Bar

This high-quality, chrome-plated steel bar is engineered for versatile strength training and weightlifting applications. Featuring a unique closed-loop design with parallel grip sections, it allows for a diverse range of exercises and multiple grip orientations. Its robust steel construction ensures durability under heavy loads, while the smooth chrome finish resists corrosion and provides a comfortable, secure grip for both home and commercial gym environments.

Construction & Design

Material and Finish	Chrome-plated steel
Design Features	Closed-loop design, Parallel grip sections, Corrosion-resistant

Compatibility & Use

Suitable Environments	Home Gym • Commercial Gym
Plate Compatibility	Standard weight plates
