

Welded Steel Cement Storage Silo

These large-capacity welded steel silos are designed for storing cement and other powdered materials. They feature robust steel construction for durability and are equipped with dust control systems to minimize environmental impact.

ADDITIONAL IMAGES

Product Overview

Industrial-Grade Cement Storage

This welded steel silo provides a robust and reliable solution for the bulk storage of cement, fly ash, and other construction materials. Engineered for durability, the system includes integrated auxiliary components for efficient material handling, dust collection, and homogenization. With customizable dimensions and configurations, this silo is designed to optimize site performance and ensure operational safety in demanding industrial environments.

Technical Specifications

Supported Materials

- Cement
- Fly ash
- Coal ash
- Lime
- Water
- Beer
- Liquids

Core Components

PLC, Motor, Conveyor system, Silo

Galvanization Quality

275-600g/m2

System Features

Integrated Auxiliary Systems

System Type

Bucket Elevator Or Pneumatic Feed

Effective Dust Collector System

Homogenization System

Materials Discharging System

Materials Truck Loading System

Compliance and Service

Warranty Terms

1 Year

Warranty (Core Components)

1 Year

Warranty (General)

Certifications

ISO 9001:2008
