

Welded Steel Wire Mesh

This welded wire mesh is constructed from quality steel, featuring horizontal and vertical wires welded at each intersection. The resulting product is level, flat, and structurally sturdy.

Product Overview

Versatile Industrial Fencing and Screening

This welded steel wire mesh is engineered for durability and consistent performance across diverse environments. Featuring a protective zinc coating, the mesh offers excellent resistance against corrosion, making it suitable for long-term outdoor and industrial use. Its robust construction makes it an ideal solution for agricultural fencing, safety enclosures, and general-purpose screening requirements.

Technical Specifications

Surface Treatment

Galvanized • Corrosion Resistant

Availability

- Various roll heights
- Various roll lengths
- Multiple wire gauges
- Range of mesh opening sizes

Material

Steel wire with zinc coating

Primary Applications

Agricultural, Industrial, Residential, Fencing, Screening, Enclosures
