

# Welded Wire Mesh Fencing

Welded wire mesh fencing is available with either a galvanized or plastic-coated finish. It is suitable for garden fencing, animal enclosures, and general perimeter security.

## Product Overview

### Versatile Welded Wire Mesh Solutions

Welded wire mesh fencing provides a robust and reliable solution for a wide range of containment and security needs. Constructed from high-quality welded wire, these fences offer exceptional strength and durability for both commercial and residential applications. Available in both galvanized and plastic-coated finishes, the material ensures longevity against environmental factors and provides a clean aesthetic for perimeter security or animal enclosures.

## Physical Properties

### Applications

- Garden fencing
- Animal enclosures
- General perimeter security

### Available Finishes

Galvanized, Plastic Coated

## Performance

### Corrosion Resistance

High Durability • Corrosion Resistant
