

Welder Gloves - Leather, Heat Resistant

These gloves are designed for welding, cutting, and other high-heat applications. Constructed from durable leather, they offer excellent heat and abrasion resistance.

Overview

Professional Grade Welding Protection

These deluxe welders gloves are engineered for superior protection and comfort in demanding industrial environments. Constructed from high-quality split cowhide leather and reinforced with Kevlar stitching, they provide exceptional heat resistance and abrasion protection. Designed for welding, cutting, and high-heat applications, the 35 cm length ensures extended forearm coverage for maximum safety.
