

Welding Hand Shield for Eye and Face Protection

This welding hand shield protects the eyes and face from sparks, spatter, and harmful radiation. It is made from durable, heat-resistant materials and provides a safe barrier for welding applications.

Product Overview

Professional Welding Protection

The HM401 Welding Handshield is a high-performance protective device engineered to shield the face and eyes from sparks, spatter, and harmful radiation. Built from durable, heat-resistant materials, it offers a reliable barrier for demanding welding environments. The design features an ergonomic handle for precise control and a high-clarity lens, making it an essential tool for both professional welders and hobbyists seeking safety and efficiency.

Key Features

Protective Capabilities

Spark Protection, Spatter Resistance, Radiation Shielding, Heat Resistant

Design & Ergonomics

Target User

- Professional welders
- Hobbyists

Handle Design

Ergonomic grip for secure handling

Performance

Lens Performance

Optimized for high visibility and clarity
