

Welding Hand Shield

This welding hand shield provides essential eye and face protection during welding operations. Its durable, heat-resistant construction blocks harmful sparks, spatter, and radiation, while the ergonomic design ensures a comfortable grip and precise control.

Product Overview

Professional Welding Hand Shield

The JS-WH03 welding hand shield is engineered to provide robust eye and face protection during demanding welding operations. Constructed from durable, heat-resistant materials, it effectively shields the user from harmful sparks, spatter, and radiation. Its ergonomic design allows for a comfortable grip and precise maneuverability, while the high-quality dark lens enhances visibility of the weld pool and reduces eye strain.

Key Features

Design Focus

- Ergonomic grip for comfortable handling
- High-quality dark lens for weld pool visibility
- Lightweight construction for maneuverability

Safety Capabilities

Spark Protection, Spatter Resistance, Radiation Blocking, Heat Resistance

Technical Specifications

Recommended Use

Industrial Environments • General Welding

Model Number

JS-WH03
